Art Unit: 1745

### **DETAILED ACTION**

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-11, drawn to an electrode, classified in class 429, subclass 231.8.
  - II. Claims 12-16, drawn to a method of producing disentangled carbon nanotubes, classified in class 204, subclass 173.
  - III. Claims 17-30, drawn to a lithium battery, classified in class 429, subclass 231.95.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are the electrode and a method of producing carbon nanotubes which are unrelated since the electrode may or may not comprise the carbon nanotubes and the carbon nanotubes may or may not be in an electrode.
3. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of a method of producing carbon nanotubes and a lithium battery are unrelated because the carbon nanotubes may or may not be within the battery and the lithium battery may or may not comprise carbon nanotubes.

Art Unit: 1745

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Ashley I. Pezzner on October 31, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
